  inflating: Block/NotificationBar.php
  inflating: Block/ColorPicker.php
  creating: etc/
  inflating: etc/acl.xml
  inflating: etc/config.xml
  inflating: etc/module.xml
  creating: etc/adminhtml/
  inflating: etc/adminhtml/system.xml
  creating: Helper/
  inflating: Helper/Data.php
  creating: view/
  creating: view/frontend/
  creating: view/frontend/layout/
  inflating: view/frontend/layout/default.xml
  creating: view/frontend/templates/
  inflating: view/frontend/templates/notificationbar.phtml
  creating: view/frontend/web/
  creating: view/frontend/web/css/
  creating: view/frontend/web/css/source/
  inflating: view/frontend/web/css/source/_module.less
  creating: view/frontend/web/js/
  inflating: view/frontend/web/js/notifybar.js
  inflating: composer.json
  inflating: registration.php
```

2. Install the extension

a) Using Composer

Install the extension using composer via command if purchased from Magento Marketplace

```
composer require decryptweb/notificationbar:2.0.0
```

b) Manual Installation

Browse to the Magento root directory where Magento 2.4.x is installed.

Browse to the path **/app/code** inside Magento root directory, create a directory **Dw** and sub-directory **NotificationBar** inside.

Copy the content of the unzip extension into **app/code/Dw/NotificationBar** .

The directory hierarchy inside **app/code/Dw/NotificationBar** should look like as shown in the image below :

3. Enable the extension

Browse to the Magento root directory in the terminal.

Run the Magento 2.4.x install command from the Magento root directory :

```
php bin/magento setup:upgrade
```

Above command will enable the module, you can check the status of the module by executing the below mentioned command

```
php bin/magento module:status Dw_NotificationBar
```

This would show a message 'Module is enabled'

In case its not enabled, execute

```
php bin/magento module:enable Dw_NotificationBar
```

4. Configuration of the component

The module configuration can be found at

Admin > Stores > Configuration (Settings) > DecryptWeb Extensions > DW NotificationBar

Default values will already be filled, edit configuration related to Notification Bar and view the changes in the Home Page
