  creating: etc/adminhtml/
 inflating: etc/adminhtml/system.xml
  creating: etc/frontend/
 inflating: etc/frontend/events.xml
 inflating: etc/module.xml
 inflating: etc/acl.xml
 inflating: etc/config.xml
 inflating: etc/email_templates.xml
  creating: Helper/
 inflating: Helper/Data.php
  creating: Observer/
 inflating: Observer/MailNotification.php
  creating: view/
  creating: view/frontend/
  creating: view/frontend/email/
 inflating: view/frontend/email/customer_registration_notification.html
 inflating: composer.json
 inflating: registration.php
```

## 2. Install the extension

### a) Using Composer

Install the extension using composer via command if purchased from Magento Marketplace

```
composer require decryptweb/notificationmail:2.0.0
```

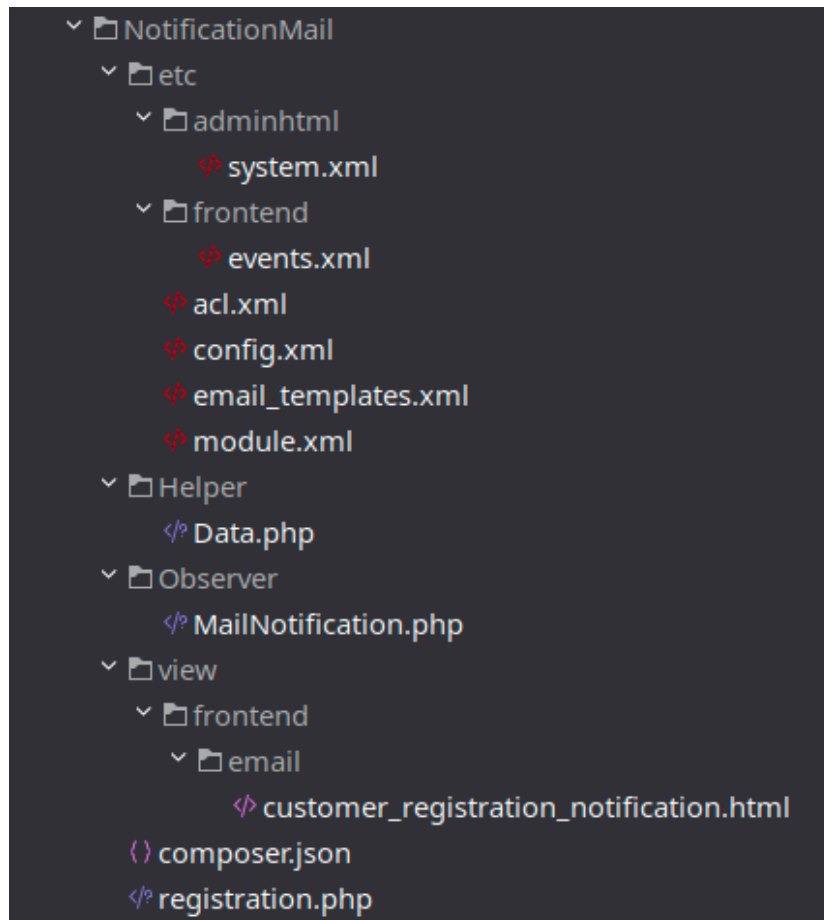

### b) Manual Installation

Browse to the Magento root directory where Magento 2.4.x is installed.

Browse to the path **/app/code** inside Magento root directory, create a directory **Dw** and sub-directory **NotificationMail** inside.

Copy the content of the unzip extension into **app/code/Dw/NotificationMail** .

The directory hierarchy inside **app/code/Dw/ NotificationMail** should look like as shown in the image below :

### 3. Enable the extension

Browse to the Magento root directory in the terminal.

Run the Magento 2.4.x install command from the Magento root directory :

***php bin/magento setup:upgrade***

Above command will enable the module, you can check the status of the module by executing the below mentioned command

***php bin/magento module:status Dw\_NotificationMail***

This would show a message 'Module is enabled'

In case its not enabled, execute

***php bin/magento module:enable Dw\_NotificationMail***

#### **4. Configuration of the extension**

The module configuration can be found at

Admin > Stores > Configuration (Settings) > DecryptWeb Extensions > DW Notification Mail

Notification mail will be disabled by default
