2. Install the extension

Browse to the Magento root directory where Magento 2.x is installed.

Browse to the path **/app/code** inside Magento root directory, create a directory **Dw** and sub-directory **Profit** inside.

Copy the content of the unzip extension into **app/code/Dw/Profit**.

The directory hierarchy should look like as shown in the image below :

3. Enable the extension

Browse to the Magento root directory in the terminal.

Run the Magento 2.x install command from the Magento root directory :

php bin/magento setup:upgrade

Above command will enable the module, you can check the status of the module by executing the below mentioned command

php bin/magento module:status Dw_Profit

This would show a message 'Module is enabled'

In case its not enabled, execute

php bin/magento module:enable Dw_Profit

4. Configuration of the component

The module configuration can be found at

Admin > Stores > Configuration (Settings) > DecryptWeb Extensions > DW Order Profit

Some default values will already be filled, set 'Show Column' to Yes for showing the profit column in order grid
