Order Profit Column

User Guide

How to configure the extension.

1. Configure the extension.

For installation kindly refer the installation manual.

Once installed kindly browse to
Admin > Stores > Configuration (Settings) > DecryptWeb Extensions > DW Order Profit, below mentioned options will be seen

- **Show Column**: If set to 'No', the profit column will not be seen in the order grid.
  The default value is set to 'No' when installed.

- **Column Name**: Specify the title of the column that will be seen in the order grid.
  The default value is set to 'Profit' when installed

- **Consider Subtotal with Tax**: If set to 'Yes', in case you have applied tax to the products, the profit calculation will consider the subtotal inclusive of the taxes.
  The default value is set to 'No' when installed.

- **Consider Subtotal with Discount**: If set to 'Yes', in case catalog rule or coupon discount have been applied to the products when placing an order, the profit calculation will consider the subtotal inclusive of the discount.
  The default value is set to 'No' when installed.

- **Can Drag Column**: If set to 'No', the column cannot be dragged in the order grid.
  The default value is set to 'Yes' when installed.

Set 'Show Column' to Yes and click on Save for showing the profit column in order grid

2. Order grid

Kindly browse to Admin > Sales > Orders, a column named Profit (default value set on installation) will be seen.
